For Planning, Management and Monitoring

Property Map Solutions

Benefits of a property plan:

Used to meet legal planning requirements (such as a Property map of assessable vegetation PMAV, Feedlot Management plan, Water management plans etc).

Used in Funding, loan and approval applications.

Planning improvements (such as fences, pipelines and watering points)

Documented emergency plan for bushfires and floods.

Calculate length and area

Maps will generally cost between \$150 and \$250, depending on the number of photos required

Please allow at least 7 weeks for delivery

Computer Based Maps

Maps available on CD. Easily inserted into mapping programs.

Demonstration programs and general information available

Geographical Information Services

We use ArcView GIS software in conjunction with a Large format plotter/printer (HP Designjet500). This has the ability to print posters, and maps up to 42 inches wide and any length.

We have the ability to

- ▶ calculate area, and distance
- ▶ Overlay other information where available (such as soils, vegetation, weeds etc.)
- ▶ Display 3D views of some areas
- ▶ Add in points from GPS units
- ▶ Find and purchase information on your behalf where needed.
